

How to add a new user into the Google cloud JClass.Solutions as an Editor (19-09-2022)

Step-1: Go to the url "https://cloud.google.com/" after login to your google account.

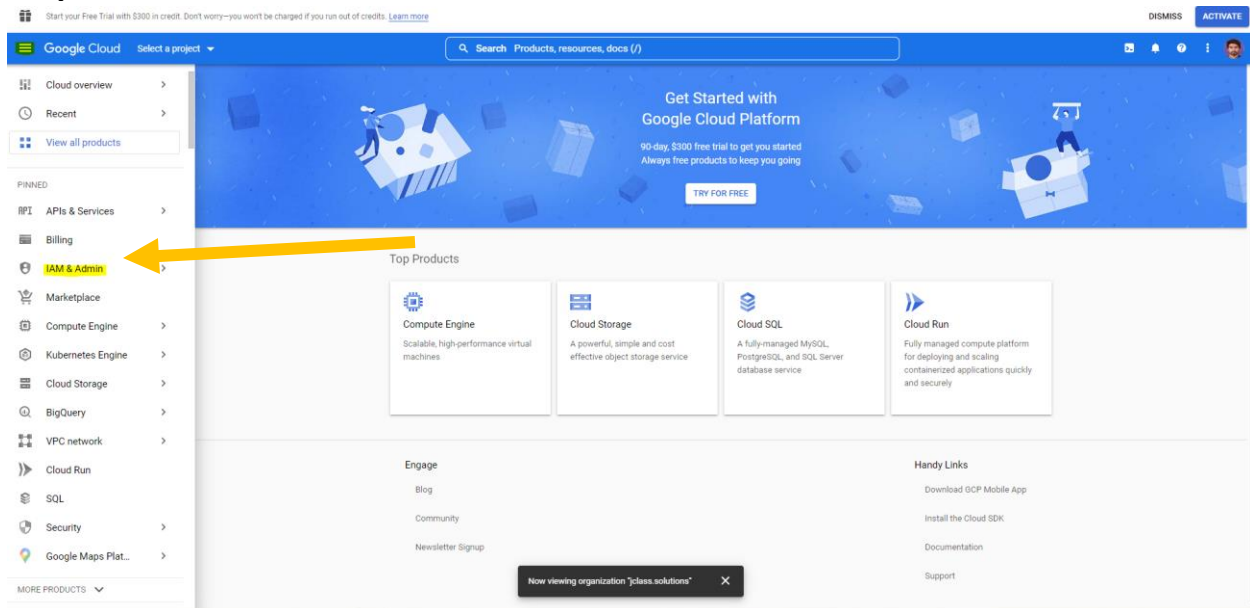

Following website will show up

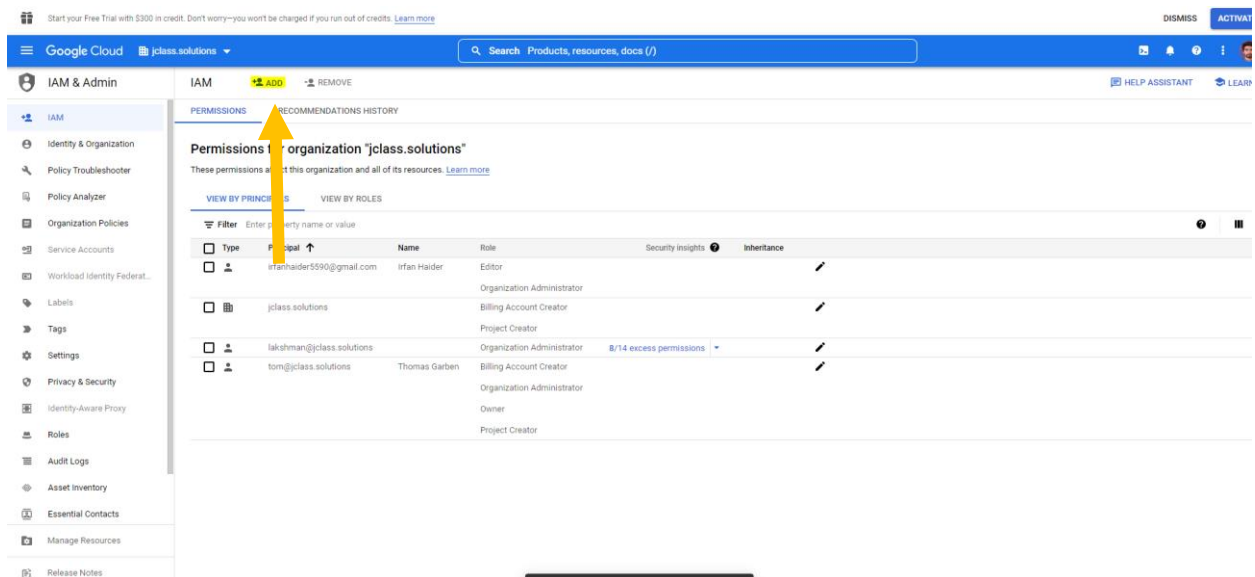

Step-2: Click on console button which is on top right corner

Step-3: Click on IAM & Admin label from the left panel

Step-4: Click on +ADD button on top

Step-5: Now add **email-Id** in the **New Principals** tab to which you want to give rights or to add in the project and **select roles** you want to assign to that account.

The screenshot displays the Google Cloud IAM & Admin console interface. The left sidebar shows the navigation menu with 'IAM & Admin' selected. The main content area is titled 'Permissions for organization "jclass.solutions"' and includes a table of principals and roles. A modal window titled 'Add principals, roles to "jclass.solutions" organization' is open, showing the 'New principals' tab with the email 'ifanhaider5590@gmail.com' entered. The 'Select a role' dropdown is open, showing a list of roles including 'Organization Administrator' which is highlighted.
